COMPLIANCE

In order to process your tissue order, the following guidelines must be followed:

1. Agree that Universal Precautions will be used when handling tissue.
2. Agree to comply with MERI's AV and photography policy:
Photography, video recording and/or audio recording is prohibited unless scheduled with prior authorization from a MERI manager or MERI staff member in charge of the event. No identifying marks can be recorded such as faces, birthmarks and/or tattoos.
3. Agree that MERI MUST receive the tissue back after research and education is complete.
4. Agree that MERI will and MUST handle final disposition (cremation or medical incineration) of the tissue.
5. Agree that written approval from the venue has to be submitted to your company, and a venue representative understands that cadaveric tissue will be used in their facility. MERI reserves the right to contact the venue directly to verify approval.
6. I attest that I have appropriate experience utilizing NAM, have been trained in the proper safety procedures, and the NAM will be utilized for the surgical/medical procedures described in this Program Request Form.

Tissue shall be utilized in a clean fashion, in an appropriate location using standard surgical preparation, instrumentation and technique. Prior to utilization, the venue site must be suitable using pre-established criteria. The venue location must minimally have the following features:

1. Designated space.
2. Lockable doors with restricted access or security measures in place to monitor access.
3. Access to working sinks and adequate drainage throughout the space.
4. Non-porous surfaces (walls, floors, ceilings, doors, counters, tables, and cabinetry) built of materials that can be easily disinfected and cleaned.
5. Venue abides by OSHA rules and regulations.
6. Designated and lockable refrigeration devices for storage of tissue, if applicable.
7. Appropriate signage for alerting persons of any biological or chemical hazards, safety-related procedures and policies and any restrictions on the taking of videos, photographs or other images.
8. Ventilation with direct exhaust to the exterior with a fan that achieves at least 12 air exchanges per hour at the venue for tissue prepared with formalin or other noxious chemicals.

AUTHORIZATION

SIGNATURES BELOW INDICATE AGREEMENT TO ALL REQUIREMENTS, INCLUDING TISSUE AND VENUE COMPLIANCE.

Employees authorized to enter into this agreement must sign below on behalf of the requesting entity and MERI. Electronic or typed signatures on this document represent original signatures:
